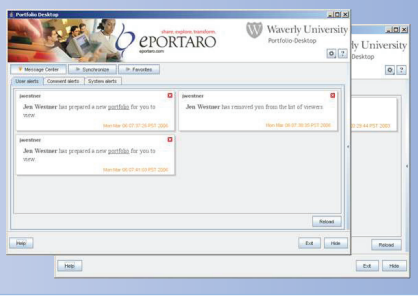
Introducing the next wave in electronic portfolios

GoFolio™ by imi

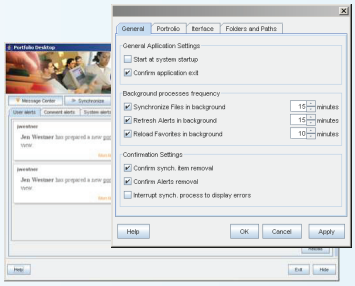
The electronic portfolio laptop and desktop utility that makes it a snap to manage your online life!

SYNCHRONIZE



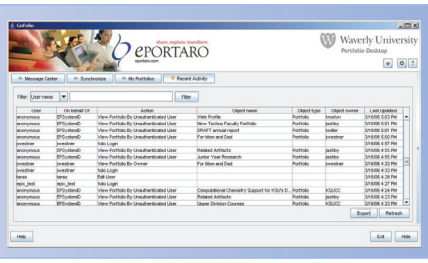
- Keep your document artifacts in-sync between your desktop and your **folio by ePortaro™** application.
- Create priority rules to keep up with changes made online to your assignments, spreadsheets, images & other documents.
- No internet connection? Don't worry, re-sync will occur automatically once you have connectivity and automatically update the documents directly to your e-portfolios.

ORGANIZE



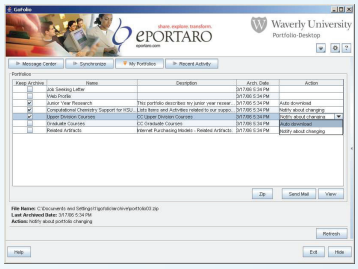
- Keep hot-links to your public and private portfolios at your fingertips.
- Find links to your favorite portfolios in a hurry.
- See system, user, & personal alerts on-screen in realtime. Look for comments & reviews left by others.
- Quick and easy access to important hyperlinks to get you online in a hurry.

ANALYZE



- Find out who, what, when and for how-long viewers are looking at your electronic portfolios.
- Learn which portfolios are most intriguing to others, and which items they are spending the most time on.
- Track your own usage events and save them to disk.

ARCHIVE



- Keep final versions of your electronic document artifacts on a locally attached drive, thumb-drive, or writable CD/DVD.
- Manage HTML-based offline archives of your favorite **folio by ePortaro™** electronic portfolios.
- Store XML-based data extracts from your **folio by ePortaro™** portfolios.

STANDARDIZE

- **GoFolio™** runs on Windows® or Macintosh® computers.
- **GoFolio™** uses a fully secure web-services compliant interface to your online **folio by ePortaro™** system.
- **GoFolio™** is EPIXSPEC™ compliant (ePortfolio Interoperability XML Specification at www.epixspec.org)
